Projects

Job Portal
Techno College of Enigineering — 2025 - 2026
A job portal website connects job seekers with employers, offering features like job listings, resume uploads, application tracking, and employer profiles. It streamlines the hiring process by matching candidates with suitable opportunities and helping companies find qualified talent efficiently.

Portfolio Website — 2024-2025
Personal Project
A personal portfolio site built using HTML, CSS, and JS.
To showcase my talents in the coding fields.
Deployed the site using GitHub Pages for public access.

Soil Moisture Detector
Tripura Institute of Technology — 2022- 2023
Designed and built a low-cost soil moisture detection system using sensors and a microcontroller (e.g., Arduino). A simple software that was made to detect moisture present in the soil. Measured real-time soil moisture levels to support efficient irrigation and reduce water waste.
